

PACKAGE LEAFLET: INFORMATION FOR THE USER

Clocardio[®]
75 mg film-coated tablets
Clopidogrel

Read all this leaflet carefully before you start taking this medicine

- Keep this leaflet. You may need to read it again.
- If you have any further questions, ask your doctor or your pharmacist.
- This medicine has been prescribed for you. Do not pass it on to others. It may harm them, even if their symptoms are the same as yours.
- If you get any side effects, please talk to your doctor, or pharmacist or other healthcare professional or directly to the National Medicines Agency (Mesogion 284, 15562, Cholargos, www.eof.gr)

In this leaflet:

1. What **Clocardio[®]** is and what it is used for
2. Before you take **Clocardio[®]**
3. How to take **Clocardio[®]**
4. Possible side effects
5. How to store **Clocardio[®]**
6. Other information

1. WHAT CLOCARDIO[®] IS AND WHAT IT IS USED FOR

Clocardio[®] belongs to a group of medicines called antiplatelet medicinal products. Platelets are very small structures in the blood, which clump together during blood clotting. By preventing this clumping, antiplatelet medicinal products reduce the chances of blood clots forming (a process called thrombosis).

Clocardio[®] is taken to prevent blood clots (thrombi) forming in hardened blood vessels (arteries), a process known as atherothrombosis, which can lead to atherothrombotic events (such as stroke, heart attack, or death).

You have been prescribed **Clocardio[®]** to help prevent blood clots and reduce the risk of these severe events because:

- you have a condition of hardening of arteries (also known as atherosclerosis), and
- you have previously experienced a heart attack, stroke or have a condition known as peripheral arterial disease, or
- you have experienced a severe type of chest pain known as «unstable angina» or «myocardial infarction» (heart attack). For the treatment of this condition your doctor may have placed a stent in the blocked or narrowed artery to restore effective blood flow. You should also be given acetylsalicylic acid (a substance present in many medicines used to relieve pain and lower fever as well as to prevent blood clotting).
- you have an irregular heartbeat, a condition called «atrial fibrillation» and you cannot take medicines known as «oral anticoagulants» (vitamin K antagonists), which prevent new clots from forming and prevent existing clots from growing. You should have been told that «oral anticoagulants» are more effective than acetylsalicylic acid or the combined use of **Clocardio[®]** and acetylsalicylic acid for this condition. Your doctor should have prescribed **Clocardio[®]** plus acetylsalicylic acid if you cannot take «oral anticoagulants» and you do not have a risk of major bleeding.

2. BEFORE YOU TAKE CLOCARDIO[®]**Do not take Clocardio[®]:**

- if you are allergic (hypersensitive) to clopidogrel or any of the other ingredients of **Clocardio[®]**,

- if you have a medical condition that is currently causing bleeding such as a stomach ulcer or bleeding within the brain,
- if you suffer from severe liver disease.

If you think any of these apply to you, or if you are in any doubt at all, consult your doctor before taking **Clocardio**[®].

Take special care with Clocardio[®]:

If any of the situations mentioned below apply to you, you should tell your doctor before taking **Clocardio**[®]:

- If you have a risk of bleeding such as:
 - a medical condition that puts you at risk of internal bleeding (e.g. stomach ulcer).
 - a blood disorder that makes you prone to internal bleeding (bleeding inside any tissues, organs or joints of your body)
 - a recent serious injury.
 - a recent surgery (including dental)
 - a planned surgery (including dental) in the next seven days
- If you have had a clot in an artery of your brain (ischemic stroke) which occurred within the last seven days.
- If you have kidney or liver disease.

While you are taking **Clocardio**[®]:

- You should tell your doctor if a surgery (including dental) is planned.
- You should also tell your doctor immediately if you develop a medical condition (also known as Thrombotic Thrombocytopenic Purpura or TTP) that includes fever and bruising under the skin that may appear as red pinpoint dots, with or without unexplained extreme tiredness, confusion, yellowing of the skin or eyes (jaundice) (see section 4 «POSSIBLE SIDE EFFECTS»).
- If you cut or injure yourself, it may take longer than usual for bleeding to stop. This is linked to the way your medicine works as it prevents the ability of blood clots to form. For minor cuts and injuries e.g., cutting yourself shaving, this is usually of no concern. However, if you are concerned by your bleeding, you should contact your doctor straightaway (see section 4 «POSSIBLE SIDE EFFECTS»).
- Your doctor may order blood tests.

Clocardio[®] is not intended for use in children or adolescents.

Taking other medicines

Please tell your doctor or pharmacist if you are taking or have recently taken any other medicines, including medicines obtained without a prescription.

Some other medicines may influence the use of **Clocardio**[®] and vice versa.

You should specifically tell your doctor if you take

- oral anticoagulants, medicines used to reduce blood clotting,
- a non-steroidal anti-inflammatory medicine, usually used to treat painful and/or inflammatory conditions of muscle or joints,
- heparin or any other injectable medicine used to reduce blood clotting,
- omeprazole, esomeprazole or cimetidine, medicines to treat upset stomach,
- fluconazole, voriconazole, ciprofloxacin or chloramphenicol, medicines to treat bacterial and fungal infections,
- fluoxetine, fluvoxamine or moclobemide, medicines to treat depression,
- carbamazepine or oxcarbazepine medicines to treat some forms of epilepsy,
- ticlopidine, other antiplatelet agent.

If you have experienced severe chest pain (unstable angina or heart attack) you may be prescribed **Clocardio**[®] in combination with acetylsalicylic acid, a substance present in many medicines used to relieve pain and lower fever. An occasional use of acetylsalicylic acid (no more than 1000mg in any 24 hour period) should generally not cause a problem, but prolonged use in other circumstances should be discussed with your doctor.

Taking Clocardio[®] with food and drink

Clocardio[®] may be taken with or without food.

Pregnancy and breast feeding

It is preferable not to take this product during pregnancy.

If you are pregnant or suspect that you are pregnant, you should tell your doctor or your pharmacist before taking **Clocardio[®]**. If you become pregnant while taking **Clocardio[®]**, consult your doctor immediately as it is recommended not to take clopidogrel while you are pregnant

You should not breast-feed while taking this medicine.

If you are breast-feeding or planning to breast-feed, talk to your doctor before taking this medicine.

Ask your doctor or pharmacist for advice before taking any medicine.

Driving and using machines

Clocardio[®] is unlike to affect your ability to drive or to use machines.

Important information about some of the ingredients of Clocardio[®]

Clocardio[®] contains lactose. If you have been told by your doctor that you have intolerance to some sugars (e.g. lactose), contact your doctor before taking this medicine.

3. HOW TO TAKE CLOCARDIO[®]

Always take **Clocardio[®]** exactly as your doctor has told you. You should check with your doctor or pharmacist if you are not sure.

If you have experienced severe chest pain (unstable angina or heart attack), your doctor may give you 300 mg **Clocardio[®]** (4 tablets of 75 mg) once at the start of the treatment. Then, the usual dose is one tablet **Clocardio[®]** of 75 mg per day to be taken orally with or without food and at the same time each day.

You should take **Clocardio[®]** for as long as your doctor continues to prescribe it.

If you take more Clocardio[®] than you should

Contact your doctor or the nearest hospital emergency department because of the increased risk of bleeding.

If you forget to take Clocardio[®]

If you forget to take a dose of **Clocardio[®]** but remembered within 12 hours of your usual time, take your tablet straightaway and then take your next tablet at the usual time.

If you forgot for more than 12 hours, simply take the next single dose at the usual time. Do not take a double dose to make up for the forgotten individual dose.

If you stop taking Clocardio[®]

Do not stop the treatment unless your doctor tells you to do so. Contact with your doctor or pharmacist before stopping.

If you have any further questions on the use of this product, ask your doctor or pharmacist.

4. POSSIBLE SIDE EFFECTS

Like all medicines **Clocardio**[®] can cause side effects, although not everybody gets them.

The frequency of possible side effects listed below is defined using the following convention:

- very common (affects more than 1 user in 10)
- common (affects 1 to 10 users in 100)
- uncommon (affects 1 to 10 users in 1.000)
- rare (affects 1 to 10 users in 10.000)
- very rare (affects less than 1 user in 10.000)
- not known (frequency cannot be estimated from the available data)

Contact your doctor immediately if you experience:

- fever, signs of infection or extreme tiredness. These may be due to rare decrease of some blood cells.
- signs of liver problems such as yellowing of the skin and/or eyes (jaundice), whether or not associated with bleeding which appears under the skin as red pinpoint dots and/or confusion (see section 2 «**Take special care with Clocardio**[®]»).
- swelling in the mouth or skin disorders such as rashes, itching and blisters. These may be signs of an allergic reaction.

The most common side effect reported with Clocardio[®] is bleeding. Bleeding may occur as bleeding in the stomach or bowels, bruising, haematoma (unusual bleeding or bruising under the skin), nose bleed, blood in the urine. In a small number of cases, bleeding in the eye, inside the head, the lung or the joints has also been reported.

If you experience prolonged bleeding when taking Clocardio[®]

If you cut or injure yourself, it may take longer than usual for bleeding to stop. This is linked to the way your medicine works as it prevents the ability of blood clots to form.

For minor cuts and injuries e.g., cutting yourself, shaving, this is usually of no concern. However, if you are concerned by your bleeding, you should contact your doctor straightaway (see section 2 «**Take special care with Clocardio**[®]»).

Other side effects reported with Clocardio[®]:

Common side effects: Diarrhea, abdominal pain, indigestion or heartburn.

Uncommon side effects: Haedache, stomach ulcer, vomiting , nausea, constipation, excessive gas in stomach or intestines, raches, itching, dizziness, sensation of tingling and numbness.

Rare side effects: Vertigo

Very rare side effects: Jaundice; severe abdominal pain with or without back pain; fever, breathing difficulties sometimes associated with cough; generalised allergic reactions; swelling in the mouth; blisters of the skin; skin allergy; inflammation of the mouth (stomatitis); decrease in blood pressure; confusion; hallucinations; joint pain; muscular pain; changes in the way things taste

In addition, your doctor may identify changes in your blood or urine test results.

If you get any side effects, please talk to your doctor, or pharmacist or other healthcare professional or directly to the National Medicines Agency (Mesogion 284, 15562, Cholargos, www.eof.gr)

5. HOW TO STORE CLOCARDIO[®]

Keep out of reach and sight of children.

Do not use **Clocardio**[®] after the expirations date which is stated on the carton and on the blister after EXP.

Refer to the storage conditions on the carton.

If **Clocardio**[®] is supplied in PA-ALU-PVC/Aluminium, store below 25°C.

If **Clocardio**[®] is supplied in all aluminium blisters, it does not require any special storage conditions.

Do not use **Clocardio**[®] if you notice any visible sign of deterioration.

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help to protect the environment.

6. OTHER INFORMATION

What **Clocardio**[®] contains

The active substance is clopidogrel. Each tablet contains 75 mg clopidogrel as hydrogen sulphate).

The other ingredients are:

Core: Isomalt (720), Microcrystalline cellulose Ph 102, Crospovidone, Calcium stearate.

Coating: OPADRY II PINK (31K34146): Titanium Dioxide E171, FD&C Yellow #6/ Sunset yellow FCF Aluminium Lake, Triacetin, HPMC 2910/ Hypromellose 15cP, Iron Oxide Red E172, Lactose Monohydrate, Yellow, Iron Oxide E172.

What **Clocardio**[®] looks like and contents of the pack

Clocardio[®] 75mg are pink, round, and biconvex film-coated tablets.

Clocardio[®] 75mg is marketed in carton containing 28 or 100 film-coated tablets in PA-ALU-PVC/Aluminium blisters.

Not all pack sizes may be marketed.
